

hydroGEOPHYSICS

Subsurface Imaging and Innovative Solutions shedding light on the earth beneath your feet.

- Leak Location
- Leak Detection & Monitoring
- Environmental
- Mining
- Groundwater
- Site Clearance & Avoidance
- Geotechnical
- Archeological
- Oil & Gas

The image above was produced from data acquired during a pressurized injection monitoring project. The data were inverse modeled to produce volumetric images of solution coverage. This image shows the progression of fluid movement at three different times during the injection at a depth of 110 feet (note 3 blue color changes in plume injection).

Innovative Geophysics

Innovation, quality, detail, and flexibility are hallmarks of HGI's service. We create custom-fit solutions for individual client needs, making us an industry leader in the field of geophysics and geosciences.

HGI is a solution-oriented geophysical consulting company and service provider to the environmental, engineering, groundwater, mining, oil & gas, and natural resource exploration industries. We specialize in the application of 3D geophysical methods and time lapse subsurface monitoring of fluid flow through geologic materials.

HGI Services

Leak Location

- Bare Liner Integrity Testing
- Ponds
- Pipes
- Mining Heaps
- Tailings Piles
- Landfills

Leak Detection & Monitoring

- Ponds
- Tanks
- Dams
- Mining Covers

Environmental

- Plume Mapping
- Contaminant Source ID
- Acid Rock Drainage
- Corrective Action Monitoring

Groundwater

- Basin Delineation
- Fracture Mapping
- Karst Investigation
- Salt Water Intrusion

Mining

- Heap Characterization
- Exploration
- Liner Integrity
- Acid Rock Drainage
- Covers & Cap Integrity Testing
- Enhanced Metal Recovery

Site Clearance & Avoidance

- Infrastructure Mapping
- Pipeline Mapping
- Underground Storage Tanks
- Buried Debris

Geotechnical

- Void Detection
- Depth to Bedrock
- Engineering Construction
- Concrete Inspection

Oil & Gas

- Exploration
- Subsurface Monitoring

Archeological

- Site Investigations

Signature Services

HGI created a Leak Detection service to provide solutions for leaking containment systems aimed at industrial-scale problems for mining, nuclear, agricultural, oil&gas, waste, and chemical markets.

After years of applying geophysics on metal mines and gaining a wealth of experience, HGI has created Heap Solutions, a service dedicated to improving metal recovery from ore in heap leach mining operations.

Methods

Resistivity

- IP
- Induced Polarization

RPM

- Residual Potential Mapping

Gravity

- Seismics

Magnetics

- GPR
- Ground Penetrating Radar

EM

- Electromagnetics

HGI Safety

Safety matters, and with HGI, safety always comes first! Our employees are certified in First Aid, Life Saving, MSHA, OSHA, and have obtained thousands of hours of job-specific safety training.
